PRODUCT CATALOGUE

Arcade Mania: Our Mission

“To create unforgettable experiences that take you to the golden age of arcade games through our craftsmanship and innovation.”

At Arcade Mania®, we come to work every day because we love games – and we want to share the love. The growth of retro gaming has been staggering over the past decade. Users around the world fondly remember their first high score, the beautiful simplicity of those classic games, and the adrenaline-pumping music and sound effects. Many gamers have attempted to re-experience that golden age by downloading emulators or attempting their own builds. Sadly, this fails to recreate that unique arcade experience we all love and remember.

Personalisation

Make your machine truly yours

At Arcade Mania ®, we work with you every step of the way to ensure you get the machine you desire.

Buttons, Joysticks and Trim

Whether our machine ends up in your home, games room or office, we want it to look the part. Choose from a range of colours and styles for the components, as seen on the following page, so that your machine can seamlessly blend into your surroundings or become the centrepiece everyone can't stop talking about.

Artwork

We offer a range of different artworks to suit your style, more of which can be seen on the final page. However, we know you may want to bring your own flair to the machine and so we connect you with our designer to get you the perfect machine.

Connect you with our designer once your order is confirmed

Our designers will create the 1st revision, providing digital images of your machine

We'll do up to 2 revisions to make sure you're happy - then we will start creating your custom machine!

Components

Customise your machine to your heart's content with our vast range of options

Concave Buttons

These standard buttons come in various, customisable colours. In an increasingly quiet world, the satisfying clicks of the microswitches will surely take you back to simpler times!

Full Face LED Buttons*

There's no beating around the bush with these. Fully illuminated in all their glory to add that wow-factor to your new addition.

Chrome Bezel LED Buttons*

The shine of LEDs meets the elegance of chrome on these buttons. With an illuminated face and chrome surround, your machine will attract all the eyes in the room.

Eclipse LED Buttons*

Dark yet light, this style of LED is surely for the discreet. The blacked-out face and illuminated surroundings add a stealthy look to your machine.

Suzo Happ Joysticks

U.S. manufactured, high quality, and precision-engineered- these joysticks are amongst the finest in the market. With their microswitch reliability tested to 10,000,000 cycles, you can be sure these will last you for years to come.

Sanwa Balltop Joysticks*

If you're after the true retro experience, these Japanese joysticks are as good as they come. Whilst there are many replica's out there, we only import and use those which are genuine. Enjoy the precision and accuracy of Sanwa.

Trim

Your arcade machine can really be brought to life with the trimming surrounds. We offer a range of colours, now including chrome and gold*.

Buttons and joysticks available in black (except LED buttons), blue, green, orange (only concave buttons, sanwa balltop joystick), red, purple (only concave buttons), white and yellow.

*Available at an additional cost.

Classic Machine

Our Classic Machine has been given a revision.
